Janet tells of the one of the most horrendous journeys that top end women and children had to undertake in December 1941, two months before Darwin was bombed.

Janet received a NT History Grant to interview evacuees and the interviews were heart wrenching. In many cases, the women and their children were given very little notice when they were told they were being evacuated from Darwin. All their possessions had to fit in a small suitcase and many didn't get the chance to say goodbye to their husbands. The conditions on many of the ships were overcrowded and carelessly catered for. It was a long and arduous journey with a lot of port stops along the way. Those who didn't have family to go to were billeted with strangers or had to fend for themselves.
